

Thank you for choosing our clinic to help you achieve your family's health care goals. Much like primary health care providers, Naturopathic doctors are trained to: use the same physical exams, the same laboratory tests, and recognize the same signs and symptoms of disease.

The main difference between Naturopathic and traditional Western Medicine is the philosophy underlying the treatment plan. While traditional Western Medicine tends to focus on treating the symptoms of an illness, the naturopathic approach emphasizes treating the whole person – mind, body, spirit.

Treatments include homeopathy, botanical medicine, clinical nutrition, Bowen Therapy, EFT (Emotional Freedom Techniques), and lifestyle counseling.

For more information on the philosophy of naturopathic medicine, or the treatments we offer, please visit my web page at www.radianthealth.ca

Our Office & Your Appointment

Cancellation policy

If you are unable to make your scheduled appointment time, please give us at least 24 hours notice. Due to the fact that last minute cancellations do not allow time to schedule waitlisted patients, any appointment cancelled without due notice will be charged for the full price of the appointment.

Our Patient Forms

We appreciate the time and effort you put into filling out treatment forms. While filling out these forms may seem tedious, they are very important in terms of assessing health concerns and forming a treatment plan. You may either email the completed forms back to me, or you may bring them with you to your appointment.

Prescriptions

In order to make filling prescriptions convenient for our patients, we keep many of the prescribed supplements on hand. If you need to refill a supplement, you are welcome to stop by during our office hours, though it is strongly recommended that you call before coming in order to confirm that the office is open, and to ensure that we have the necessary supplements on hand.
